1 STATEMENT BY THE BOARD OF DIRECTORS OF SIRMA GROUP HOLDING JSC

The present annual consolidated report of the management of SIRMA GROUP HOLDING JSC covers the period, ending on 31 March 2018and was prepared in accordance with the provisions of Article 39 of the Accountancy Law and Art. 1000, para. 2 and 5 of the the Public Offering of Securities Act (POSA), including also the established events, occurring after the balance sheet date. The structure of this report is in accordance with Appendix 9, 10 and Appendix 11 to Article 32a (2) of Ordinance No. 2 of the Financial Supervision Commission (FSC).

The board of directors of the holding confirms that:

- there were no irregularities in which managers or employees were involved, which may be material to the consolidated financial statements;
- all material transactions are duly accounted for and reflected in the annual financial statements as at 31 March 2018:
- there is no actual or potential breach of laws and (or) other regulatory provisions which would have a material impact on the consolidated financial statements or could serve as a basis for reporting contingent loss;
- there are no legal or other restrictions on the flow of funds;
- there are no known trends, requests, commitments, events or occasional circumstances for which there is reason to expect that they may affect the company as a whole.

This management report contains estimates and information based on our beliefs and assumptions, using currently available information about them. Any statements contained in this report which are not historical facts are predictions. We have based these statements on the future of our current expectations, assumptions and predictions about future conditions and events. As a result, our predictions and information are exposed to uncertainties and risks, many of which are beyond our control. If one or more of these uncertainties or risks materialize or if the underlying management assumptions prove to be incorrect, our actual results may differ materially from those described in the report. We describe these risks and uncertainties in the report in the Risk Section.

This report includes IT industry statistics and global economic trends which come from information published

by sources including International Data Corporation (IDC), a market information and information technology consultant, telecoms and consumer technology markets; Gartner, the European Central Bank (ECB); and the International Monetary Fund (IMF). This type of data is only the forecasts of IDC, the ECB, the IMF and other data sources for the global economy and industry. SIRMA does not guarantee any statistical information provided by sources such as IDC, Gartner, ECB, IMF, or other similar sources cited in this report. In addition, although we believe that information from these sources is generally reliable, this type of data is inaccurate. We warn readers not to create unnecessary dependence on this data.

In our Annual Consolidated Management Report, we analyze our business activities for the reporting financial period as well as the current situation of Sirma Group Holding. Starting from a description of our business, economic environment and strategy, we present our financial system and explain in detail our results and operations as well as our financial position and net assets. We also report on the various aspects of financial sustainability of Sirma Group Holding and the expected development of possible risks.

The financial information presented in the Sirma Group Holding JSC report includes our separate financial statements, our report to the Board of Directors and some financial aspects derived from our management accountability. The non-financial data presented in the report includes aspects of intellectual, human and social rights and relationships derived from our materiality assessment.

Our annual consolidated financial statements have been prepared in accordance with IFRSs. Internal control over financial reporting ensures the reliability of the information presented in the separate financial statements. Our Board of Directors has confirmed the effectiveness of our internal financial reporting.

All financial and non-financial data and information for the reporting period is collected and / or reported by the responsible business units.

The reporting period is the financial period ending on 31.03.2018. The report includes Sirma Group Holding JSC and all subsidiary companies of the group without Flash Media, EngView Systems Systems USA, Engview Systems Systems Latin America, Sirma Sha - Albania,e-Dom and GMG Systems, which are excluded from consolidation due to lack of relevance.

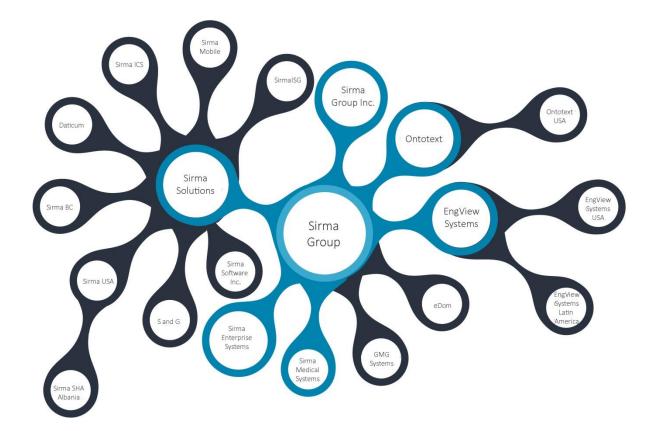

2 ORGANIZATION AND WAY OF PRESENTATION

Sirma Group Holding JSC is a holding company which invests in technological businesses, manages them strategically and operationally, provides its subsidiaries with administrative, marketing and financial services.

Over the years, Sirma has created over 20 companies, investing in them a tremendous financial and human capital.

Generating robust growth, cost-effectiveness and consistent business results are among the top priorities for all companies in the group.

The reports of Flash Media AD, EngView Systems USA, EngView Systems Latin America, Sirma Sha - Albania, e-Dom and GMG Systems are not included due to lack of relevance to the consolidated statements of Sirma Group Holding JSC.

2.1.1 History and development of the company

Tsarigradsko Shosse, No 135. The name of the company changed on 23.03.2009 from "SGH" JSC to "Sirma Group Holding" JSC.

The object of the company is: ACQUISITIONS, MANAGEMENT, EVALUATION AND SALE OF

PARTICIPATION IN BULGARIAN AND FOREIGN COMPANIES, ACQUISITION, EVALUATION AND SALE OF PATENTS, CESSION OF LICENSES TO USE PATENTS OF COMPANIES WHICH THE COMPANY HOLDS, FINANCE OF COMPANIES IN WHICH THE COMPANY PARTICIPATES, ORGANIZATION OF ACCOUNTING AND COMPILING FINANCIAL STATEMENTS UNDER THE LAW OF ACCOUNTING. THE COMPANY MAY PERFORM INDEPENDENT BUSINESS ACTIVITIES WHICH ARE NOT PROHIBITED BY LAW.

2.1.2 Changes in the statement of activity:

At the time of its incorporation, the company operated under the following business activities: design, development, marketing, sales, implementation, training and support of software products and complete solutions, including software project management, information and communication technology consultancy services, accounting services, as well as any other activity not prohibited by law.

On 23.03.2009 Sirma Group Holding changed its scope of activity as follows: Acquisition, management, evaluation and sale of participations in Bulgarian and foreign companies, acquisition, evaluation and sale of patents, surrender of licenses for use of patents of companies in which the holding company participates, financing of the companies in which the holding company participates, organization of the

accounting and preparation of financial statements under the order of the Law for Accounting. The company may also carry out its own commercial activity, which is not prohibited by law.

From the establishment of the company until the date of this document, Sirma Group Holding JSC:

- · is not the subject of consolidation;
- no transfer or pledge to the enterprise;
- No claims have been filed for the opening of insolvency proceedings of the company;
- There are no tenders from third parties to the Company or from the Company to other companies;

2.2 CAPITAL

The share capital of the company amounts to 59,360,518 BGN, divided into 59 360 518 dematerialized shares with nominal value of BGN 1.

2.2.1 History of Share Capital

History of changes in share capital

 \bullet $\,$ The company was incorporated with BGN 50,000 of capital.

On 15.10.2008, after the adoption of three triple expert appraisals of experts, the share capital was increased from BGN 50,000 to BGN 77,252,478 through non-cash contributions and issuance of new 77,202,478 shares. Non-cash contributions are as follows:

- 1) 29 software modules worth 61,555,838 BGN;
- 2) Non-monetary contribution representing real estate amounting to 3 911 660 BGN:
- ☐ Office building offices, floor 3th and floor 5th of an office building, located in Sofia, 135 Tsarigradsko shose

On 22.10.2010. as a result of the decision of the regular annual general meeting of the Company's shareholders, a reduction of the capital of Sirma Group Holding JSC from 77,252,478 BGN to 73,340,818 BGN was recorded through the cancellation of 3,911,660 shares with a par value of one BGN each. The Company's capital was reduced on the basis of Art. 200, para. 2, in conjunction with Art. 187f, par. 1, item 2n of the Bulgarian Commercial Law.

Blvd., owned by "Sirma Group" AD, a company registered in the Commercial Register at the Registry Agency UIC 040529004, with headquarters and address of management in Sofia, Mladost district, 135 Tsarigradsko shose Blvd., accepted as shareholder in "SGH" AD by decision of the General Meeting of "SGH" JSC from 10.07.2008

- 3) Non-cash contribution representing shares of 11 734 980 BGN:
- ☐ A total of 81,690 shares of the total amount of 11,734,980 BGN (143.6526 BGN per share) of the capital of "Sirma Group" JSC, registered in the Commercial Register at the Registry Agency UIC, 040529004

During the transformation, entered in the Commercial Register on 23.10.2014, the Company's capital is reduced to 49 837 156 through the cancellation of 23 503 662 shares. This decrease is a result of the estimated fair value of the shares of Sirma Group Holding JSC by three independent apprasers. The shareholder structure of the Company does not change as the shareholder structures of the transforming and that of the newly established companies are mirrored.

On 30.10.2015, after a successful initial public offering, the capital was increased to 59 360 518 BGN by issuing 9 523 362 new shares with nominal value per share 1 BGN and issue value 1,20 BGN.

8 STATEMENT ON WHETHER THE COMPANY COMPLIES OR DOES NOT TO THE REGIME FOR CORPORATE GOVERNANCE

In view of the fact that Sirma Group Holding JSC is entered in the Register under Art. 30, para. 1, item 3 of FSCA, kept by FSC, the Company has implemented a Program prepared in accordance with internationally recognized standards for good corporate governance. In accordance with the provision of Art. 100n, para. 4, item 3 of POSA, the financial statements of Sirma Group Holding JSC comply with its Program for the application of internationally recognized standards for good corporate governance and maintains its accounting policy in accordance with International Accounting Standards.

9 OUR BUSINESS MODEL

In order to accompany our customers in their digital transformation and the massive transition of their business into a secure cyberspace, we took advantage of our technological advantages and skills. We have focused on preparing them for the intelligent enterprise era. An intelligent enterprise can model, bind, classify, and use data as a core asset for doing business. It has smart documents in an excellent collaborative environment, receives additional information to help make critical business decisions. This enhances customer satisfaction, performance and efficiency. We started creating virtual agents in the financial industry. We have entered a new niche in health care - the management of chronic diseases. We have achieved excellent cyber-security success using unique methods to protect the digital space. We have expanded our capabilities through a set of semantic technologies to provide our customers with better content management, knowledge detection, and semantic search. Our vision and mission unlock our ability to create a positive economic, environmental and social effect. By playing this role, we must

have the necessary capital. First, we rely on the financial capital provided by our investors. But what really increases our success is the intellectual and social capital - our employees. They are the gateway to our knowledge, experience and business relationships. For this reason, committed, highly qualified and flexible employees are at the center of our business model and success. Sirma Group Holding is a group of quasi-independent legal entities, holding directly or indirectly 50% to 100% of the capital of the group of companies. The holding usually controls the management, determining the development of the group's companies, their investments and their budgets. It also provides legal, financial and administrative services, coordinates marketing and HR policies. With this model, Sirma manages to develop a strong vertical and regional specialization, to concentrate knowledge on customers, environments and specifics. The group manages to combine technologies and products in different verticals, to build synergies between individual businesses, building a unified corporate culture and values.

10 SIRMA GROUP HOLDING IN Q1 2018

10.1 THE BUSINESS

Established in 1992, Sirma has become one of the largest IT companies in the region for 25 years, owning a range of proprietary, innovative technologies, a diverse product portfolio and growing market share in Europe and North America.

Sirma owns software solutions for a wide range of businesses with a focus on the development of cognitive technologies (AI). The Group has diversified market exposure exclusively to the private sector with a stable customer portfolio. Sirma's products are concentrated in the most promising and high-tech areas - financial technology, semantics, industrial software, IoT, computer vision, telemedicine. In 2017, as part of its renewed strategy, the group began a focused effort to build cross-selling capacity, updated its sales and marketing model in line with the global trends - Software as a Service model.

Sirma is a globally recognizable company in semantic technology and among the top 10 worldwide in the areas of Graph Databases (GrpahDB), Text Analysis, Data Detection, and Federationing (Bloor, 2016). One of Sirma's products -EngView Package Designer Suite CAD is part of the design and packaging solutions of world leaders in the printing industry. The Holding is one of the regional leaders of the IT market, with 60% of the operators in the financial sector being its clients. Sirma is a top class regional cloud service provider with Class 4 Data Center licensed to store data from the Bulgarian National Bank and other organizations requiring increased data security. Through one of its companies, the Holding is the leader in the SaaS delivery to insurance brokers. Sirma has a strong presence on the US market by running a huge number of IT consulting projects. The group has a broad partner and distribution ecosystem in over 50 countries around the world.

Some of Sirma's unique advantages are:

- The Best RDF Triplestore in the World;
- Top Text Analitycs Engine for Business (used by BBC, AstraZeneca, Ministry of Defense, USA);
- Face recognition technology among the top 10 worldwide:
- Extensive expertise in news and social media analysis;
- Extensive expertise in creating Chatbot and Al Assitant applications.

In 2017, the group developed its 5-year "Sirma 2022 Strategy". Sirma focuses on the process of transforming organizations into "intelligent organizations." We have technology and know-how for all stages of this transition from data collection - internal, external, structured, unstructured, open, connected, "dark" etc., through the development of models and knowledge repositories, the development of analytical models and predictive models based on artificial intelligence, to the provision of "human" interfaces of the next generation.

The main elements of the Strategy are:

- Technological transformation through concentration of R&D and core cognitive technology in the SENPAI (Sirma ENterprise Platform with AI) a cloud based platform with a new level of artificial intelligence (cognitive computing), allowing the intelligent evolution of organizations in everything;
- · Increasing the commercialization of technologies;
- Expansion and technological leap in Sirma's product portfolio through:
- o Cloud base;
- o Development of new products with a cognitive element;
- o Integration of the existing portfolio with the SENPAI cognitive platform.
- Complementing the sales model from predominantly on premise to SaaS sales;
- Significant expansion of the distribution network and partner ecosystem to improve the sales model in addition to direct sales and sales through a major affiliate distribution network, including increasing OEM partnerships;
- · Organizational restructuring to implement the strategy.

The transition to the SaaS sales model, the increase of cognitive sales, combined with planned marketing and sales investments will ensure a smooth and steady growth of Sirma to a global level and an increase in the value of the Group.

Our philosophy about our strategic technologies and products is that we embody the sense of human thought - perception, interpretation, forecasting and decision making.

By adopting the 2018-2022 Strategy, in 2017, we began preparing for its implementation. We provided debt finance to eliminate minority holdings in Ontotext - a key company for the Strategy implementation. We have developed detailed development plans for both the cognitive core (SENPAI) and the strategic verticals of the group. We have begun a process of organizational and technological restructuring.

We achieved very good financial results in 2017. The consolidated operating income for the year 2017 is BGN 52.037 million, which is 25.14% more than revenues in 2016. EBITDA increased by 23.66%, compared to the results in 2016, reaching BGN 15.363 million As a result, Sirma Group Holding achieved a 68.71% growth in consolidated net profit on an annual basis in 2017. The net profit for 2017 is in amount of BGN 6,190 million. Return on equity (ROE) also increased significantly, with 65.46%, compared to last year and reached 5.22% in 2017. EBITDA margin in 2017 is 30.69%. The net profit margin increased by 34.92%, reaching 11.92% in 2017. This resulted in an increase in Sirma Group Holding's EPS of BGN 0.06 in 2016 to BGN 0.10 in 2017, growing by 68.71%.

Economic Trends

Macro frame

According to data from the National Statistical Institute, in March 2018, the total business climate indicator increased by 0.7 percentage points compared to February 2018. Business performance improvement was registered in construction and retail trade, while in industry it kept its level from the previous month. Only in the service sector is the indicator decreasing.

The composite indicator "business climate in industry" remains at its level in February 2018, according to the National Statistical Institute. Industrial developers assess the current production activity as a decrease, and their expectations for activity over the next three months are slightly worsening. The main factor hampering enterprises is still the precarious economic environment, followed by labor shortages, the latest poll showing the intensification of the adverse impact of the second factor. Regarding sales prices in industry, managers expect them to remain unchanged over the next three months.

According to the National Statistical Institute, the composite business climate indicator in retail trade grew by 3.2 percentage points versus February 2018, as a result of optimistic retailers' expectations about the business situation of enterprises over the next six months. At the same time, their forecasts for both sales volumes and external suppliers' orders over the next three months are improving. The factors "competition in the industry," "insufficient demand" and "uncertain economic environment" continue to make it difficult for businesses to do the most. With regard to selling prices, traders do not expect any change over the next three months.

According to data from the National Statistical Institute in March 2018, the composite indicator "business climate in the service sector" decreased by 1.4 points mainly due to more reserved managers' assessments of the present business situation of the enterprises. In terms of demand for services, the current trend is estimated to be slightly reduced, while expectations for the next three months are improving. Competition in the industry and the uncertain economic

environment remain the main problems for the business development. With regard to sales prices in the services sector, managers expect to maintain their level over the next three months.

The economic assessment of the Governing Council of the ECB on 8 March 2018 indicates that the world economy grew even more rapidly in the second half of 2017 and provided an additional stimulus for euro area exports. It is expected that global economic activity will remain strong, although the rate of growth will gradually slow down. World trade growth is expected to remain sustainable in the short run, while inflation will rise slowly due to the global decline in free production capacities. Under the ongoing economic upturn, euro area government bond vields rose from mid-December 2017. However, corporate bond spreads remained broadly stable and average spreads between government bond vields and overnight index swap rates somewhat diminished overall . Share prices dropped in an environment characterized by strong fluctuations. In forex markets the euro appreciated in nominal terms. According to macroeconomic forecasts, the economic upturn in the euro area continues to be strong and broad across countries and sectors, with quarterly real GDP increasing by 0.6% in the fourth guarter of 2017. Private consumption was stimulated by rising employment, labor market reforms, and rising household welfare. Private sector investment continued to intensify as a result of very favorable financing conditions, rising business profitability and stable demand, while household investment experienced improvement over recent quarters. In addition, the broad upturn of the world economy provides an incentive for euro area exports. This assessment was also reflected in the March 2018 euro area macroeconomic projections of ECB experts, which forecast annual real GDP growth in the euro area of 2.4% in 2018, 1.9% in 2019, and 1.7% in 2020. Compared to the Eurosystem staff macroeconomic projections of December 2017, the GDP growth projection is revised upwards by 2018 and remains unchanged for the period thereafter. The risks to the growth outlook are assessed as fully balanced. On the one hand, the main cyclical momentum can lead to stronger growth in the short term. On the other hand, the risks to lower growth continue to be associated primarily with global factors, including those stemming from increasing protectionism and trends in foreign exchange markets and other financial instruments markets.

10.2 SEGMENTS

THE GROUP DEFINED OPERATION IN SEVERAL SEGMENTS:

STRATEGIC VERTICALS

FINANCE	HEALTHCARE	INDUSTRIAL SOLUTIONS	MEDIA, PUBLISHING AND CULTURAL HERITAGE	RETAIL	CROSS INDUSTRY BUSINESS SOLUTIONS

11 INVESTMENTS BY COMPANIES

For information on company investments, please see Appendix 4.

12 MAIN MARKETS

Consolidated earnings of Sirma Group Holding for the historical period under review are of different nature and geographic origin. Traditionally, revenues from services and goods have the highest share. At the same time, Europe, North America and the United Kingdom are at the forefront of geographic distribution of earnings. Revenues by region and countries are presented in the following table

REVENUE BY REGIONS AND COUNTRIES:

	31.03.2018	31.03.2017	Change	Change
Region	BGN '000	BGN '000	BGN '000	%
Australia	3	1	2	200,00%
Asia	34	214	-180	-84,11%
Africa	24	14	10	71,43%
Europe	7651	6473	1178	18,20%

North America	2100	2545	-445	-17,49%
Total	12560	10480	2080	19,85%

"Sirma Group Holding" JSC and the companies from the Group realize their production and services without geographical restrictions. However, traditionally the highest sales Group generates in Europe and North America. These, together with United Kingdom revenues, occupy traditionally 99,49 % of the total amount of consolidated revenue. Nevertheless, due to the exceptional diversification of its products and services, which are applied in many different sectors and customers, we can not talk about any dependence of the Group on individual clients or on particular service

14 CONSOLIDATED FINANCIAL RESULTS

14.1 CONSOLIDATED REVENUES

Consolidated revenues in Q1 2018 includes:

	31.3.2018	31.3.2017	Change	Change
	BGN '000	BGN '000	BGN '000	%
Operating revenues from the sale of goods	4350	3284	1066	32,46%
Operating revenues from sales of services	8024	7098	926	13,05%
Revenues from financing	45	45	0	0,00%
Operating revenue from others	141	53	88	166,04%
Total	12560	10480	2080	19,85%

Consolidated revenues grow steadily at a high rate of 19,85% or BGN 2 080 thousand during the period considered, which is in line with the upward trend in the business sector of the Group. The increase in consolidated revenues is due both to the attraction of new customers and to the increase in the volumes of existing ones.

The largest share in the increase of consolidated revenues is the consolidated revenues from sales of goods, increased by BGN 1 066 thousand or by 32,46% compared to the previous period, followed by consolidated revenues from sales of services, increased by BGN 926 thousand or by 13,05% compared to Q1 2017.

Revenues from sales of services by type:

	31.3.2018	31.3.2017	Change	Change

14.3 CONSOLIDATED OPERATING EXPENSES

	31.3.2018	31.3.2017	Change
	BGN '000	BGN '000	BGN '000
Material expenses	-372	-98	-274
Change in %			279,59%
Expenses for external services	-2406	-1347	-1059
Change in %			78,62%
Depreciation and amortization of non-financial assets	-994	-2469	1475
Change in %			-59,74%
Cost of goods sold and other current assets	-4051	-3010	-1041
Change in %			34,58%
Changes in stocks of finished products and incomplete production	1772	111	1661
Change in %			1496,40%
Capitalized own expenses	1144	3264	-2120
Change in %			-64,95%
Other expenses	-377	-331	-46
Change in %			13,90%
Total expenses	-5 284	-3 880	-1404
Change in %			36,19%

In Q1 2018, consolidated operating expenses gradually increased in line with the Group's consolidated revenues. The highest share in consolidated operating expenses has consolidated external service costs (45,53%), followed by depreciation and amortization (18,81%).

14.4 CONSOLIDATED FINANCIAL INCOME / EXPENSES NET

	31.3.2018	31.3.2017	Change	Change	
	BGN '000	BGN '000	BGN '000	%	
Financial expenses	-306	-213	-93	43,66%	
Financial income	134	91	43	47,25%	
Financial income / expenses net	-172	-122	-50	40,98%	

Consolidated financial expenses increased by BGN 93 thousand or by 43,66 % in Q1 2018, mainly due to the increase in expenses on currency operations. Financial income also increased by BGN 43 thousand or by 47,25%, mainly due to the increase in revenues from currency operations.

14.5 CONSOLIDATED ASSETS

Like the revenues, assets posted an increase of BGN 12,546 thousand or 10,46% over 2017. Traditionally, most of them, or 26,38%, occupy intangible assets, incl. Goodwill (14,74%), which is dictated by the activity of the Group and its ownership over a significant amount of software modules.

14.5.1 NON-CURRENT ASSETS

	31.3.2018	31.12.2017	Change	Change
Assets	BGN '000	BGN '000	BGN '000	%
Non-current assets

Deferred income and financing	377	414	-37	-8,94%
Other liabilities	998	2735	-1737	-63,51%
Total Current liabilities	18 475	22 267	-3792	-17,03%

Current liabilities decreased by 17,03% in Q1 2018.

14.8 CASH FLOWS

The Group has no liquidity problems and operates with the available resources while maintaining a low level of indebtedness for the period under review. Traditionally, the largest pay-out in revenue streams is paid by customers, while the role of a negative item is paid by payments to suppliers and payments for staff and social security contributions.

SUMMARY OF CASH FLOW

	31.3.2018	31.12.2017	Change	Change

14.11 PERSONNEL AND ECOLOGY

Sirma Group Holding maintains and observes its commitments in compliance with the national legislation in the field of environmental protection. The company applies measures for separate collection of waste, minimization, recovery and recycling of municipal waste. In 2017, the use of plastic cups stopped, and they were replaced with porcelain and glass.

The Company believes that its employees play a key role in the development of its business and the overall corporate goals and therefore pays special attention to the development of a common human resources management

strategy and policies. Sirma Group Holding's policies in this regard are aimed at stimulating the responsibility and motivation of the staff to fulfill the assigned tasks and objectives.

The company and the companies in the group apply certain selection criteria and consider that they have an ambitious team of professionals capable of pursuing the strategic and operational objectives. Sirma Group Holding invests in various training programs for its employees and provides its employees with opportunities for professional development.

DESCRIPTION OF ALL AGREEMENTS FOR THE PARTICIPATION OF THE EMPLOYEES IN THE CAPITAL OF THE COMPANY.

There are no arrangements for the participation of employees in the capital of Sirma Group Holding JSC. Some of the subsidiary companies of Sirma Group Holding JSC have options for the participation of key employees in the capital of the respective companies. As mentioned above in paragraph 7, the following subsidiaries have taken concrete steps in this direction:

- "Sirma Enterprise Systems" JSC bought back 13,902 registered voting shares (representing 10% of all shares) for the purpose of subsequent sale of key employees of Sirma Enterprise Systems AD (balance as at 30.09.2017 2 220 items). For this purpose, by decision of the sole owner of the capital from 15.09.2014, the redemption shares were transformed into a new class A.
- Sirma Solutions AD bought back 248,687 registered shares of the company, which consisted of 7.7% of the share capital of Sirma Solutions AD, held by the shareholder of Sirma Group Holding JSC. Purpose of redemption - Shares will be sold to key employees. For this purpose, with a decision of the GMS dated March 9, 2015, a part of the own shares were transformed and two

new classes of shares - Class A and Class B were created. At the date of this document, the balance of own shares is: 188,255 shares. shares.

• An amendment to the Articles of Association of Ontotext AD has created an option fund of the holders of ordinary shares, who have agreed to create an option fund of 1 210 215 shares for a term up to 31 March 2019 under which they are obliged to sell the included in the Optional Equity Fund, to option holders at a price per share equal to 1.17 BGN. Options of the Option Fund will be sold to key employees of the Company, key employees of subsidiaries and consultants of the Company and its subsidiaries on the fixed the previous sentence price according to the solution of the board of directors of Ontotext AD. The sale of ordinary shares under the Options Release Scheme will be made in proportion to all Shareholders holding Ordinary Shares included in the Option Fund.

There are no other options and / or arrangements for employee participation in the capital of one of the companies in the Group.

15 RISK FACTORS

THE WORDS USED IN THE REPORT AS "EXPECTS", "BELIEVES", "INTENDS" OR THE LIKE INSTRUCTIONS FOR STATEMENTS THAT ARE FORWARD-LOOKING IN NATURE AND / OR REFER TO FUTURE UNCERTAIN EVENTS AND CONDITIONS WHICH MAY INFLUENCE FUTURE BUSINESS AND FINANCIAL PLANS OF THE COMPANY, THE RESULTS OF ITS ACTIVITY AND THE FINANCIAL POSITION. WE WARN THE INVESTORS THAT THE ABOVE STATEMENTS ARE NOT A GUARANTEE FOR THE FUTURE RESULTS OF THE COMPANY'S ACTIVITY AND ARE THEMSELVES SUBJECT TO RISKS AND UNCERTAINTY. ACTUAL FUTURE RESULTS FROM THE COMPANY'S ACTIVITY MAY DIFFER SUBSTANTIALLY FROM THE FORECAST RESULTS AND EXPECTATIONS AS A RESULT OF MULTIPLE FACTORS INCLUDING THE RISK FACTORS LISTED BELLOW. (THE SEQUENCE IN THE PRESENTATION OF THE RISK FACTORS INDICATES THE VIEW OF THE BOARD OF DIRECTORS REGARDING THEIR PARTICULAR SIGNIFICANCE FOR THE ACTIVITY OF THE COMPANY AT THE PRESENT TIME).

RISKS, TO WHICH INVESTORS IN SECURITIES MAY BE EXPOSED CAN BE BROKEN DOWN BY DIFFERENT CRITERIA DEPENDING ON THEIR NATURE, MANIFESTATION, FEATURES OF THE COMPANY, CHANGES IN EQUITY OF THE COMPANY AND THE POSSIBILITY OF RISK MITIGATION OR NOT. THESE MAY BE DIVIDED INTO TWO GROUPS: SYSTEMIC AND NON-SYSTEMATIC RISKS.

RISK MANAGEMENT

The management of the risks of Sirma Group Holding is the responsibility of the Board of Directors. In its activities, it is assisted by the Investment and Risk Committee. The Holding also supports its subsidiaries in risk management.

Risk management is, inherently, the ability to anticipate threats to the company's activities, individual projects and minimize their adverse effects. The process is iterative. It

starts with identifying the possible risks, goes through risk analysis and planning their management, then begins a process of monitoring and regular return to the analysis process.

A sophisticated risk management system has been set up in Sirma Group Holding.

RISK MANAGEMENT IN SIRMA GROUP HOLDING INCLUDES:

- Risk Identification This is a lengthy process which detects potential threats. In order to identify the expected and predictable risks, different methods are used: questionnaires (interview questionnaires), interviews, brainstorming, document analysis, a list of expected and predictable risks, based on a previous experience
- Qualitative and quantitative risk analysis Once the potential risks have been identified, a qualitative and quantitative analysis of each of them is required. The likelihood of occurrence and impact through predefined scales is estimated, for example Probability: very small, small, medium, large or very large; Impact: catastrophic, critical, permissible, insignificant.

A risk table is prepared with the data. Risks are grouped into categories, their likelihood of occurrence and their impact, as well as case scenarios which are implemented in case the risk occurs. The resulting list is sorted by impact and probability. A threshold is set, the risks over which it will be managed. The risk table is reviewed and reassessed on a regular basis, as there is a possibility that risks may be dropped, new ones added or ratings changed.

Planning actions to overcome the risk

The next step in risk management is planning. This is the process of documenting the measures which will be applied to managing each of the identified key risks. 3 management strategies are used:

• risk avoidance - a strategy which reduces the likelihood of risk occurring;

15.1 SYSTEM RISKS

The general risks stem from possible changes in the overall economic system and, in particular, a change in the conditions of the financial markets. They can not be diversified, as all economic entities in the country are exposed to them.

Twenty-five years after the end of the planned economy in Bulgaria, a policy of economic reforms and stabilization aimed at the imposition and functioning of the principles of a free market economy is being pursued. As a result, business entities in Bulgaria have a limited history of activity in free market conditions. In this regard, Bulgarian companies, compared to Western companies, are characterized by a lack of experience in the market economy and limited capital resources, with which to develop their business. Bulgaria also has limited infrastructure to maintain the market system.

In Bulgaria, as in most transition countries, there is a trade deficit and a current account deficit. Our country is an importer of crude oil and energy resources. In this regard, increases in oil prices and energy resources reduce the competitiveness of the Bulgarian economy and, in addition, its dependence on oil and energy imports further exposes the economy to currency risks from unfavorable changes in the USD exchange rate against the Bulgarian Lev. The capital gains from privatization are expected to gradually decrease as the privatization program is completed.

15.1.1 Economic Growth

The interaction between economic growth and external indebtedness of the country has a direct impact on the formation and change of market conditions and the

- minimizing the risk-taking effect a strategy that reduces the consequences of the risk;
- Emergency action plans a strategy whereby the organization accepts the risk and is ready to deal with it if it comes to fruition;

As a result of the risk planning, a Risk Mitigation Monitoring and Management Plan is established. It may be a separate document or a set of information cards for each individual risk to be stored and managed in a database.

- Risk monitoring and control This is the last activity in risk management process. This process has several main tasks:
- o confirm the occurrence of a risk
- Ensure that activities to prevent or deal with risks are implemented
- o Identify what risk has caused the relevant problems
- o document information to be used in a subsequent risk analysis

investment climate. Official statistics show real GDP and GDP growth per capita in recent years, which are in line with the government's development agenda.

According to published information from NSI, after the introduction of the currency board system in 1997, Bulgaria achieved macroeconomic stability and good indicators for economic development.

Delayed economic growth, not only in Bulgaria but also in other countries where the Company realizes its output, means reduced activity on the part of economic operators, where there is also a reduced level of investment in general and in particular in software solutions. In this respect, lower economic growth adversely affects the Company's activity and would prevent the future plans from being realized according to predefined parameters.

15.1.2 Political Risk

The political risk is the likelihood of a change in government, or a sudden change in its policy, the emergence of internal political turmoil and unfavorable changes in European and / or national legislation, resulting in a negative change in the environment in which local businesses operate, and investors to suffer losses.

The political risks for Bulgaria at international level are related to the commitments made to implement serious structural reforms in the country as an equal member of the EU, increasing the social stability of the inefficient spending on the one hand, as well as the severe destabilization of the countries The Middle East, the increasing threats of terrorist attacks in Europe, refugee waves, and the volatility of key countries in the immediate vicinity of Bulgaria.

Bulgaria, as well as the other EU member states in the region, continues to be seriously affected by the common European problem of the intensive Middle East refugee flow

Other factors that also affect this risk are possible legislative changes, particularly those that concern the economic and investment climate in the country.

15.1.3 Credit Risk

The credit risk of the country is related to the ability of the state to repay its obligations regularly. In this respect, Bulgaria is constantly improving its position on the international debt markets, which facilitates the access of state and economic agents to external financing. The most important effect of the credit rating improvement is the lowering of loan risk premiums, which leads to more favorable interest rates (on equal terms). For this reason, the potential increase in the country's credit rating would have a beneficial impact on the Company's activity and more precisely on its financing. On the other hand, lowering the credit rating of Bulgaria would have a negative impact on the cost of financing the Company unless its loan agreements are fixed-rate. The determination and measurement of this risk is carried out by specialized international credit agencies.

At the date of this document, the credit rating of the Republic of Bulgaria is as follows:

- Standard & Poors Long-term BB +, short-term C, stable outlook both in foreign and local currencies;
- Moody's Long-term Baa2 with a stable outlook for foreign and local currencies;
- Fitch Raitings foreign currency long-term BBB- with stable outlook, short-term F3 with stable outlook and local currency long-term BBB with stable outlook.

Bulgaria continues to fund its needs under relatively good credit conditions, given the reduced long-term ratings. The quantitative easing policy of the European Central Bank implies the maintenance of historically low interest rates in Europe, from which it would stimulate the attraction of credit resources from all economic subjects, including the Company.

15.1.4 Currency Risk

Exposure to the currency risk is the dependence and effects of exchange rate fluctuations. The systemic currency risk is the probability of a possible change in the currency regime of the country (The Currency Board), which would either lead to a depreciation of the BGN or a rise in the BGN against foreign currencies. The currency risk will have an impact on companies with considerable market share, whose payments are made in a currency other than the BGN and the Euro. Since the Bulgarian Lev is fixed to the Euro in EUR 1 = BGN 1.95583 and the Bulgarian National Bank is obliged to maintain a level of Bulgarian BGN in circulation equal to the foreign currency reserves of the bank, the risk of depreciation of the BGN against the European currency is minimal and consists in the eventual early elimination of the Currency Board in the country. This seems unlikely at this stage as the expectations are that the Currency Board will be abolished when the Euro is adopted in Bulgaria as an official legal tender. Theoretically, the currency risk could rise when Bulgaria joins the second stage of the European Monetary Mechanism (ERM II). This is a regime in which the country has to maintain the exchange rate against the Euro within +/- 15% against the central parity. In practice, all countries currently in the mechanism (Denmark, Estonia, Cyprus, Lithuania, Latvia, Malta) are experiencing fluctuations that are substantially lower than the \pm 15% allowed. The fixed exchange rate of the BGN to the Euro does not eliminate the risk of unfavorable movements of the Euro against other major currencies (US Dollar, British Pound, Swiss Franc) on the international financial markets, but at present the company does not consider that such a risk would have a significant impact on its activities. The Company may be affected by the currency risk depending on the type of currency of its revenue and the type of currency of potential borrowings of the company.

15.1.5 Interest Rate Risk

The interest rate risk is related to possible negative changes in the interest rates established by the financial institutions in the Republic of Bulgaria.

At its monetary policy meeting on 8 March 2018, the Governing Council of the ECB concluded that the need for sufficient monetary stimulus was maintained in order to continue to strengthen the underlying inflationary pressures and to stimulate the dynamics of general inflation in the medium term. The information received since the previous monetary policy session in January, including the new ECB staff projections, confirmed the strong and all-encompassing momentum of euro area economy growth, with short-term growth projected to grow slightly expectations before tempo. This growth outlook reinforces the Governing Council's belief that inflation will move closer to the target level, below, but close to, 2% over the medium term. At the same time, baseline inflation measures remain low and still do not provide convincing signs of sustained upward trend. Under these circumstances, the Governing Council will continue to monitor the exchange rate and financial conditions in view of their possible effects on price stability over the medium term. The ongoing monetary support needed to bring inflation back to levels below but close to 2% is achieved through net asset purchases, the significant volume of assets acquired and the forthcoming reinvestment as well as through the interest rate guidance.

The key interest rates set by the BNB for the period 01.01.2018 - 31.03.2018 is 0.00%

15.1.6 Inflation Risk

Inflationary risk is a general price increase whereby money is depreciated and there is a likelihood of loss from households and firms. According to preliminary NSI data, the consumer price index for January 2018 compared to December 2017 is 100.3%, ie, monthly inflation is 0.3%. Annual inflation in January 2018 compared to January 2017 was 1.8%. The average annual inflation for the period February 2017 - January 2018 compared to February 2016 - January 2017 was 2.1%. Inflation from the beginning of the year (March 2018 versus December 2017) was 0.2% and annual inflation in March 2018 compared to March 2017 was 1.9%. The average annual inflation rate for the April 2017 - March 2018 period compared to April 2016 - March 2017 was 1.4%

Inflation for the period 01.01.2018 - 31.03.2017 is the following:

January 2018 - 0,3% February 2018. - 0,3% March 2018 -0.3%

15.2 NON-SYSTEM RISKS

Non-system risks are associated with the overall investment risk specific to the firm and the industry itself. Non-system risks can be divided into two types: sectoral risk related to the uncertainty in the development of the sector as a whole and general business risk - arising from the specifics of the particular company.

15.2.1 Industry Risks

The activity of the Company and of the companies within Sirma Group are exposed to various risks, including: 1) risks typical of the Information and Communication Technology (ICT) industry and 2) risks specific to the Company itself. Revenue and profit of the Company may be adversely affected by a number of factors: the financial market situation and the information and communication technology market; the ability of the Company to ensure effective management, assessment of the different risks and economic feasibility of individual transactions, the economic climate in the country and others

15.1.7 Risk from unfavorable changes in tax and other legislation

The taxes paid by Bulgarian merchants include taxes at source, local taxes and fees, corporate income tax, value added tax, excise duties, export and import duties and property taxes. The tax system in Bulgaria is still developing. This may result in contradictory tax practices, both at state and local level.

Investors should also take into account that the value of the investment in shares may be adversely affected by changes in the current tax legislation, including its interpretation and application. In addition, tax legislation is not the only one that can undergo changes, and thease changes adversely to affect the Company's business. Although the bulk of Bulgarian legislation is already harmonized with EU law, the application of the law is subject to criticism by the European partners in Bulgaria. Judicial and administrative practice remains problematic: the Bulgarian courts are not able to effectively resolve disputes over property rights, breaches of legal and contractual obligations, etc., resulting in a systemic regulatory risk being relatively high.

Unfavorable changes to tax and other laws would lead to a worsening of the general conditions in which the Company operates, from wherever its future results may deteriorate. In particular, the increase in the corporate income tax and other taxes would reduce the ultimate disposable profit for new investments and / or the distribution of dividends to its shareholders.

15.1.8 Force Majeure Risks

Force majeure events such as natural disasters, sabotage, war and terrorist acts, and others may lead to unpredictable changes in investor and interest in the market for all shares, as well as, in particular, the shares of Sirma Group Holding, Some force majeure events do not provide for the possibility of insurance.

Force majeure events could seriously affect the Company's performance by reducing its ability to conduct normal business activities and cause an increase in some cost items.

15.2.2 Specific Company Risk

The company risk is related to the nature of the Company's business, as for every firm it is important that the return on the invested funds and resources is consistent with the risk associated with the investment.

The main company risk for Sirma Group Holding JSC is related to the possibility of reduction of the solvent demand for the products and services offered by the Group, as well as changes in the terms of sale of those products and services. The company risk may have an impact on the growth of service and software solutions development contracts. Uncertainty can be measured by the variability of revenue earned over time. This means that the more volatile the revenues of a company, the greater the uncertainty of the company to realize a positive financial result, ie. the risk for the investors, respectively the creditors, will be higher.

15.2.3 Operation Risk

Operational risks are related to the management of the company and can be expressed in the following:

- Making erroneous decisions for the ongoing management of the investment and liquidity of the company by the management staff;
- the inability of the management team to start the implementation of planned projects or lack of suitable personnel for this;
- key employees leaving and impossibility to recruit new ones:
- the risk of excessive spending on management and administration, leading to a reduction in the overall profitability of the company.

Various mechanisms will be used to optimize and manage this risk, including the following:

- · sound investment policy;
- optimizing the structure, quality and return on assets of the Company;
- protection against unfavorable and undesirable external factors and attacks, etc.

15.2.4 Intelectual Property Protection

The protection of the intellectual property of the Group is crucial to its success. It uses a variety of tools to identify and control potential risks and to protect its intellectual property. These measures include application for patents, trademarks, and other brands and copyrights to prevent infringement of copyright and trademarks. Despite these efforts, the Group may not be able to prevent third parties from using or selling without permission what it regards as its own technology. All these measures provide only limited protection and its rights could be challenged or otherwise affected. Any intellectual property may be vulnerable to disclosure or misuse by employees, partners or third parties. Third countries can independently develop technologies that are substantially equivalent to or better

than the technology of the Company. In addition, a third party may reengineer or otherwise obtain and use technology and information that the Group considers to be its own. In this regard, the Company may not be able to protect its proprietary rights against unauthorized copying or third party use, which could have an adverse effect on the competitive and financial situation and lead to a decline in sales. In addition, the laws and courts of some countries may not offer effective protection of intellectual property rights.

15.2.5 Risk of concluding insider deals at prices differing from the market ones

The company is part of an economic group. The risk of engaging in transactions with Group entities, whose conditions differ from market at the date of the transaction is eliminated to the extent that the Company seeks to maintain a transparent policy regarding its relations and the treatment of related companies. As far as there are transactions in the economic group, they are concluded under standard market conditions at the moment of transaction and do not favor any of the parties.

15.2.6 Risk of asset depreciation

The impairment risk of assets is related to the possibility of reducing the carrying amount of the Company's assets. Possible impairment of tangible and / or intangible fixed assets would result in the need to account for an impairment loss. This, in turn, may worsen the Company's future financial performance as well as lead to a final negative financial result for an annual period. This in turn leads to the risk of not being able to distribute dividends to existing shareholders at this future moment, as well as a possible decrease in the market price of a shares of the Company due to the deteriorated financial indicators

15.3 RISK FACTORS, CHARACTERISTIC OF SHARE TRADED ON THE STOCK EXCHANGE

The risk of investing in securities is linked to the uncertainty and the inability to accurately predict future effects and the impact on the expected return on the investment made.

The main risk and uncertainty for the shareholders of Sirma Group Holding JSC is the probability that the investments in the company's shares will not retain its value, nor generate the expected return on them, due to a decrease in the price of the shares or a lack of other income (dividends) from them.

Sirma Group Holding JSC informs potential investors that investing in shares is associated with certain risks. Investors should carefully read and understand the risks associated with investing in shares of the current issue before making an investment decision.

Sirma Group Holding JSC seeks to maintain a low risk profile by maintaining low levels of financial and operational leverage, a high level of operational efficiency, the introduction of strict rules and procedures in the

management of the activity and strict control over their compliance, diversification of the client base and suppliers.

The above makes the company resistant to external negative shocks, but nevertheless has significant risks for its business that could negatively affect the company's results.

15.3.1 Price Risk

The changes in the price of the shares of Sirma Group Holding JSC can be created both from the fundamental state of the Company - current and expected results from the activity and financial results as well as from the economic and market conditions in Bulgaria and from the market and economic conditions in the world economy.

Shareholders should keep in mind that events that may cause sudden fluctuations in market prices of shares that have previously occurred on the Bulgarian capital market and in international financial markets may occur and that

such fluctuations are likely to affect unfavorable price movements of the shares of Sirma Group Holding JSC.

The market value of the shares will be determined on the basis of supply and demand, and the share price may increase or decrease. These "price fluctuations" can cause a security to cost at a certain point much less than the value at which it is purchased. This price dynamic is particularly typical for the ordinary stock market, whose stock prices may be subject to sharp fluctuations as a result of publicly disclosed information about the Company's financial performance, changes in legislation and other material events.

A significant number of sales of the shares of Sirma Group Holding JSC for a certain period of time may have an adverse effect on the maintenance of their achieved price level. Such an event would result from a significant excess of the sellers of those shares over buyers in that period. At this point in time, the Issuer or a third party does not commit to maintaining a particular price level and a significant number of sales may lead to a decrease in that level.

The Company does not guarantee to investors that the price of its shares will remain stable and / or increase its value in the future. At the moment of preparation of this document, Sirma Group Holding JSC or, to the best of its knowledge, other persons, do not intend to purchase shares of the Company in order to preserve and / or increase the market price of the Company's shares after the increase of capital.

15.3.2 Liquidity Risk

Liquidity risk is directly related to the liquidity of the securities market itself and expresses the potential for short-term purchase or sale of the securities on the secondary market. The liquidity of the issue depends on the number of investors who will be interested in investing in the issue. The liquidity risk of the shares will also depend on the development of the equity market in terms of the volume and variety of instruments offered, the issuer's financial position, the ability of the local capital market to attract new investors,

Investors should keep in mind that the BSE is significantly smaller and less liquid than the securities markets in most developed market economies. Thus, for the shareholders of Sirma Group Holding JSC there is no guarantee that the listing of the shares of the Company on the BSE will guarantee their active trading and sufficient liquidity.

15.3.3 Inflation Risk

The manifestation of the inflationary risk for the shareholders of Sirma Group Holding JSC would arise in cases when the income from the shares (increase in the price and / or received dividends) were lower than the inflation for the investment period. The inflation processes leads to a decrease in the real yield that investors receive.

Although in the long run equity yields usually outweigh the inflationary processes in Bulgaria and other countries with a developed market economy, there is no guarantee for the investors in the shares of Sirma Group Holding JSC that their investment in shares of the Company will represent a real protection against inflation.

15.3.4 Dillution Risk

Pursuant to the Articles of Association of the Company no limitations on the maximum amount of future issues of shares are envisaged. For this reason, shareholder participation may be reduced as a result of a public offering if they do not exercise their rights and do not subscribe a proportionate share of the new shares. In the event that, as a result of a future public offering, the number of issued shares of the Company increases at a faster rate than the amount of the assets of the Company, it is possible to decrease the value of the assets per share of the Company.

15.3.5 Currency Risk

This current issue is denominated in BGN. Currency risk of the investment exists for investors whose funds are denominated in US dollars or currencies other than Lev and Euro, due to the constant exchange rate movements. Investors who take a currency risk in the purchase of the current issue would increase or reduce the effective return on their investment as a consequence of strengthening or weakening the BGN and EUR exchange rate against the currency in which the investor's funds are denominated.

Stability and high confidence in the credibility of the Currency Board in the country, as well as the relatively stable positions of the euro on international currency markets, reduce the existence of the currency risk to minimum levels

15.3.6 Lack of an annual dividend payment guaranty

The financial results of the company depend on many factors, including the skills and professionalism of the management team, the development of the market in which the company operates, the economic development of the country and the region, etc. There is a risk for investors due to the lack of a guarantee for annual dividends payment.

15.3.7 Risk of change in the tax treatment of investments in shares

The risk of changing in the taxation of investments in securities is linked to the change in the current taxation regime for such instruments. The latter may be considered favorable, as capital gains are tax-exempt. Changes in capital gains tax, as well as other potential changes in the taxation of securities' investments, may have a negative impact on the final realized net result by an investor.

15.3.8 Risk factors included in the Registration document

The specific risks associated with the core activity of Sirma Group Holding JSC, as well as the general risks that may have an impact on its activities, are detailed on pages of the Registration document, Section "Risk Factors".

For additional information on the risk factors affecting the Group's activity, see Appendix 5.

16 INFORMATION ABOUT EVENTS AND INDICATORS WITH INCREASED NATURE OF THE COMPANY, HAVING A SIGNIFICANT EFFECT ON THEIR ACTIVITY AND THEIR INCOME AND EXPENDITURE; EVALUATION OF THEIR IMPACT ON RESULTS IN THE CURRENT YEAR.

20 INFORMATION ABOUT OCCURRING CHANGES IN THE REPORTING PERIOD IN THE MAIN PRINCIPLES FOR THE MANAGEMENT OF THE COMPANY AND ITS ECONOMIC GROUP.

There were no changes during the reporting period in the company's main management principles and its economic group.

21 INFORMATION ABOUT THE MAIN CHARACTERISTICS OF THE FINANCIAL REPORTING PROCESSING INTERNAL CONTROL SYSTEM AND RISK MANAGEMENT SYSTEM

Under Bulgarian law, the management should prepare an interim report on the operations and a financial statement for each quarter to give a true and fair view of the Company's financial position as of the end of the year, financial performance and cash flows in accordance with the applicable accounting framework. Management's responsibility also includes the implementation of an internal control system to prevent, detect and correct mistakes and false statements as a result of the accounting system's actions. In this respect, the management observes the following basic principles in its activities:

- adherence to a particular management and accounting policy disclosed in the financial statements;
- carrying out all operations in compliance with the laws and regulations; coverage of all events and operations in a timely manner, with the exact amount of the amounts in the appropriate accounting articles.

- accounts and the relevant reporting period so as to allow the financial statements to be prepared in accordance with the specific accounting framework;
- observance of the precautionary principle in the valuation of assets, liabilities, income and expenses;
- detection and termination of frauds and errors;
- completeness and regularity of accounting information;
- preparation of reliable financial information;
- adherence to international financial reporting standards and adherence to the going concern principle.

During the reporting period, there have been no changes in the basic principles of management of SIRMA GROUP HOLDING
